I ABOUT US

Keramia Profil produces ceramic mosaics since 2005 and has become a determinative manufacturer in the Central-Eastern European region. Our biggest advantage is our high quality. The models from the catalogues, the traders favourite products and the customers' own ideas are all feasible in our plant. It is based on the constantly evolving management, the competence of our employees and our Italian technical background. Every single element manufactured by us gets a special treatment (*cutting, drying, gluing, packing*) and we deliver our products with style and precision.

@ ORDER

Just send us an e-mail with the order and we arrange the rest. We help you to find the appropriate mosaic type, to calculate the necessary primary tiles and to define the deadline as well.

PRODUCTION

We are using the equipments from the best Italian industrial machinery companies. Our plant was built for mosaic production so we do the cutting and the assembling at the same place.

CUTTING

We are in touch with the best diamond tools companies in Italy who could serve our 2 automatic and 4 manual cutting machines without any problem. Owing to them, we can produce a flawless cut edge.

GLUING

This process is also automated and working with more than 30 different moulds. If you have a special request, our experienced colleagues can piece it together by hand.

ENVIRONS

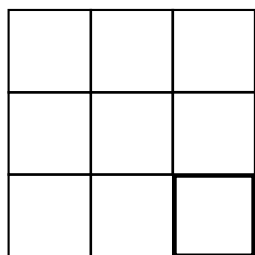

One of our latest developments was to install a water treatment system. This equipment saves a lot of water, since it collects, clarifies and recycles the used water with circulation.

DEVELOPMENT

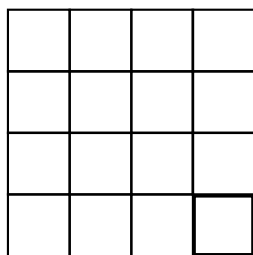

Since 2021 we have been providing our increasing electricity demand with a solar system. The investment, which was realized on our 300 m2 roof area, provides a secure and environmentally conscious power supply for all our machines.

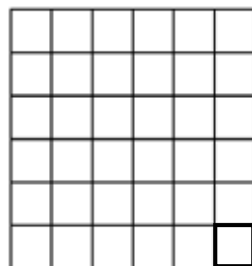

SQUARES

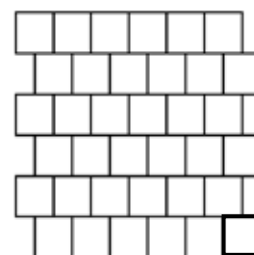

28,9 × 28,9 / 9 / **9,5 × 9,5** / 2
